

Register now for six amazing Saturdays of science and engineering with Girl's Club!

Western Engineering Outreach is proud of our tradition of promoting the participation of young women in engineering. Girl's Club will run for six Saturdays in-person at Western University, from January 14 to February 25 (with no program on February 18 due to the Family Day holiday). The cost for the program is \$120. We would like to make this program as accessible as possible, so if you require financial assistance please email our office at discover@uwo.ca for more information on available bursaries.

All students who identify as girls or non-binary youth are welcome.

Vaccination Policy No Longer In Effect

Western has committed to regularly reviewing our vaccination policy. Based on the latest consultation with our medical experts and local public health, we are revoking our vaccination policy and will no longer require students, employees, and visitors to be vaccinated to come to campus. Masks continue to be required in instructional spaces and within Western Engineering Outreach programs. Learn more here: <https://www.uwo.ca/coronavirus/>
